Competence Days 2013

Opening of the new assembly hall for large machines

Power for the future

April 24 and 25, 2013 – Kottlingbrunn, Austria

POWER FOR THE FUTURE

Dear Sir/Madam,

we take great pleasure in inviting you to our Competence Days at our plant in Kottlingbrunn on **24 and 25 April, 2013**.

Under the motto **"POWER FOR THE FUTURE"**, we will present to you innovative injection molding technology, automation and peripheral equipment – everything from a single source. The power for the future comes from the innovations of today!

Multi-component processes, perfect high-gloss surfaces, light-weight technology, gas injection processes, modern packaging technologies, fully integrated production cells and ultimate precision for medical technology as well as other trendsetting process technologies are the highlights of our Competence Days. We will demonstrate all of this to you on our latest machines from the *PowerSeries* (among other machinery), equipped with innovative automation solutions and state-of-the-art peripheral appliances.

Two days, one program: for the Competence Days, you can choose the day which suits you best. The expert presentations on selected topics will be held in German and simultaneously translated into English. Of course you will also have an opportunity to visit our new assembly shop with increased production capacity. We will also offer you sight-seeing tours to WITTMANN Kunststoffgeräte in Vienna on both days. Each one of these eventful days will close with a dinner party including an evening program.

Make use of this opportunity to gather information about innovations, latest news and trends in injection molding technology, and to see our new assembly facilities.

We look forward to seeing you!

09:15 – 10:00 *Registration*

10:00 – 10:15 *Welcome*

Presentations

10:15 – 10:45 Megatrends reflected in injection molding technology

10:45 – 11:05 Impressive advantages of the *PowerSeries*

11:05 – 11:25 Integrated production cell – everything from a single source

11:25 – 11:45 *Coffee break*

Presentations

11:45 – 12:10 Process combinations – the way to successful products

12:10 – 12:30 Light and beautiful – modern plastic parts

12:30 – 12:50 From bulk material to high-quality material: passing audits

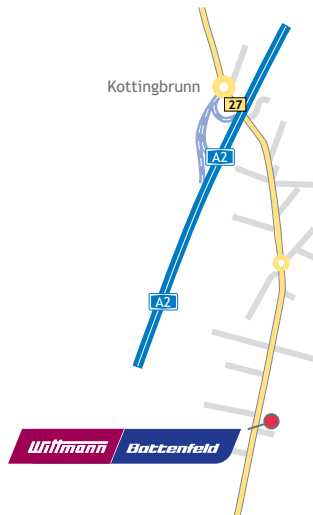

12:50 – 13:10 Optical and medical – ultimate precision through micro technology

13:10 – 14:30 *Lunch break*

14:30 – 17:00 *Machine demonstrations*

17:00 – 18:00 *Champagne reception*

18:00 *Evening program*
