

PLC CONVERTER

QUANTIOR[®]
AUTOMATION SYSTEMS

**Facilitate
migration**

**Control software
obsolescence**

**Accelerate mass
modifications**

PLC Converter is an automatic conversion and re-engineering tool allowing you to quickly and easily migrate from one PLC format to another and / or perform mass updates

**75%
faster**

**40%
cheaper**

than manually re-writing PLC code

Prevent loss of intellectual property of obsolete systems with the help of existing knowledge base

Reduce the risks linked to legacy products and errors that can occur in manual translation

Standardise programming methods across different programs with mass modifications

Automate simple 1-1 conversions and give developers more time to focus on more value-added tasks

PLC Converter was developed by **Itrix Automation**, a Schneider Electric company, who provides development tools for programmable logic controllers (PLCs).

They are already using PLC Converter:

Available target PLCs:
Schneider Electric Unity Pro,
Siemens TIA Portal,
Rockwell RSLogix5000,
GE Proficy Machine Edition...

version 2019.001
